

JUNE 1989

CONTENTS

Existence of Best Approximations in Spaces of Random Sets Nikolaos S. PAPAGEORGIOU	1
On the Complex Oscillation of Solutions of Non-homogeneous Linear Differential Equations with Polynomial Coefficients GAO Shian	11
<i>P</i> -Lattices as Ideal Lattices and Submodule Lattices E. W. JOHNSON and Johnny A. JOHNSON	21
On a Strong Nondeterministic Polynomial Time Turing Reducibility Hisao TANAKA	29
A Structure Theory of Freudenthal–Kantor Triple Systems II. Noriaki KAMIYA	41
Straight and Strongly Straight Abelian p -Groups Makoto ONISHI	61
On the Intersection Homology Group of an Analytic Space of Dimension 2 Tomohisa KATO	81
On the Local Invariant 1-Cocycle Theorem Shōichi KAWAI	87
A Tentative Reconstruction of the Formation Process of Book XIII of Euclid’s “Elements” Tamotsu MURATA	101
